

ENABLING QUALITY IMPROVEMENT IN PRACTICE

Tower Hamlets Our Latest Newsletter (13/04/2020)

How to get the quickest snapshot of your practice's COVID-19 activity

Dear busy colleagues,

We hope you might find the following helpful in getting to grips with COVID-19, and being able to quantify/visualize its impact within your practice.

Edenbridge APEX have just released a brand new COVID-19 Daily Tracker Report, to enable you as a local GP Practice understand how this outbreak of Coronavirus is impacting your local population.

Drawing on the COVID-19 code set from EMIS Web, whether entered via template or manually, Edenbridge is able to give you a full overview of how many patients have been evaluated as well as all outcome reports, broken down by age, sex and Long Term Conditions. I think it's going to become more and more of an essential resource as we move in to the coming weeks, with patients being monitored at home and discharged from hospital.

Furthermore, Edenbridge will help you assess if any clinicians have potentially had face-to-face exposure to a COVID-19 suspected or confirmed patient as well as highlighting geographical distribution.

In addition to assessing COVID-19 coded data, Edenbridge can also support you as many of you are or have already moved to a primarily remote model of working. Within Edenbridge you can define Services, based on Session Holders, Session Categories and Slot Types from EMIS Web.

Under “Organisation Settings” in Edenbridge you can quickly create “New Services” to reflect your new ways of working, which can then be applied to all of the Dashboards and Reports in the software to understand the trends of how this new form of service delivery is being utilised by your population.

To start using this new functionality or to update your configuration with new Services, login to your Edenbridge account at www.edenbridgeapex.com and for any training support, contact Edenbridge wizard ben.hampshire@edenbridgehealthcare.com

Attached is a PDF with the screenshots of the new COVID-19 module, which hopefully gives you a good feel for the tool’s functionality.

And if you feel it would be useful to host some open webinars to better understand and utilise the functionality of Edenbridge, please do drop us a line as this is something we would be more than happy to facilitate.

If the Easter Bunny did exist, you’d all be getting extra chocolate this year. In the absence of fantasy, we offer you useful IT tools instead.

Have a safe weekend. We are doing an amazing job, and we are all in this together.

Virginia and the EQUIP team
